Hi-Lo ELECTRIC & FIXED HEIGHT SCREEN TROLLEYS & MOUNTS

Hi-Lo 8960 ET
(Electric Trolley)

Hi-Lo 8961 EWM
(Electric Wall Mount)
optional extension legs

Hi-Lo 8996 FHT
(Fixed Height Trolley)

With nearly 28 years experience in the delivery of professional audio-visual solutions, we recognise that whilst electronically height adjustable screens are very flexible, there are times when fixed height solutions are appropriate. So we created the Protect range of fixed height screen mount solutions, where the screen can be manually configured to a height to best suit your needs.

Screen positioning is achieved via a secure bolt system and can be adjusted to achieve the desired height at regular increments. This sturdy range is designed for large format displays and meet the rigorous demands of many environments including education, corporate, health, exhibitions and conferences, where the presentation and showcasing of audio-visual solutions is key.

Like all our products they use universal brackets for a large variety of screens with additional safety screw down screen clamps to prevent the screens dis-mounting when in transport. Products which are designed to last and ready for change.

KIOSKS BESPOKE SOLUTIONS

Our Kiosks are strong and durable, We are always trying to improve and adapt it for our customer's requirements. At one location, where security was a primary concern. We arrived at this solution.

We attached threaded bushes to the underside of the front plate. Then drilled 4 holes in the rear of the kiosk and secured it together with Security screws. Strong Secure and still easy to clean and use.

4 Security Screws in the rear. BOLTING it together in 7 positions.

KIOSKS KEYED ALIKE LOCKS

We also offer Keyed Alike Locks. Ideal for IT Suits or Information Hubs Where you only use one key number. Each Lock comes complete with 2 keys.

information Tablet Bar

KIOSKS BESPOKE ENGINEERING

We also offer a reversed engineered solution for other Tablets other than the standard iPad 2-4 iPad Air & Air 2 Samsung Galaxy Tab 2&4 That can fit within our range of Kiosks.

28 years of Service & Security

Bouncepad Flex comes in Black and White as default. You can add a splash of colour to your branded environment with a custom finish. Pick a shade from anywhere in the spectrum. Send us your RAL colour reference.

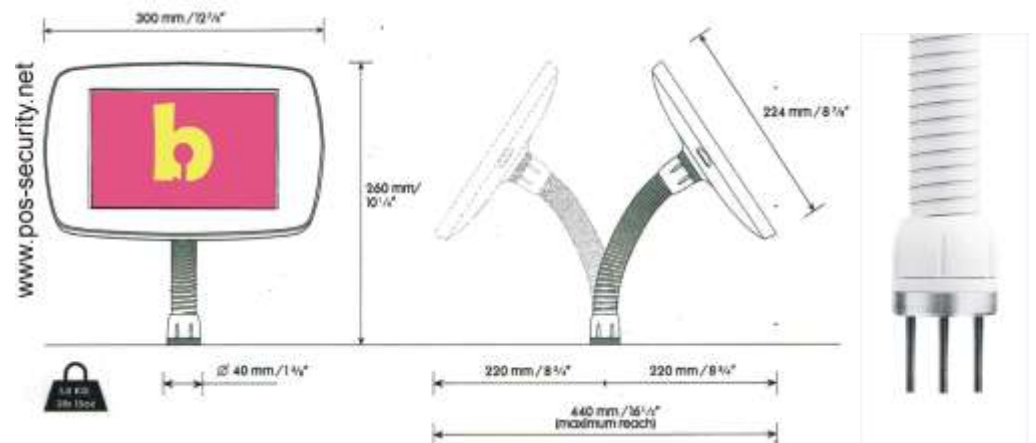

Gymnastic movement this tablet Kiosk gives users the freedom to twist and turn the case whichever way they please. This allows for the maximum interaction without compromising on comfort or security.

Robust engineering The strong yet supple gooseneck stalk is an outstanding piece of engineering that's built to last, whilst the casting keeps your tablet secure and protected.

Smart Power options run your cables through the inside of your Bouncepad to keep your tablet kiosk continuously powered and looking tidy.

Bouncepad Sumo comes ready for action. The toughest **Bouncepad** in our range has been designed to stand its ground in busy restaurants, malls, children's play areas and airports – allowing you to use tablets in challenging environments without resorting to clunky, ruggedized kit.

Six-Point Locking Sumo's unique Six Point Locking System ensures ultimate theft resistance, yet frees your tablet in an instant with our easy release access.

Motion Stalk The Sumo's Motion Stalk allows users to play games, switch between apps and share screens effortlessly.

Fit & forget Aerospace grade alloys, wide mounting points and heavy weight fixing ensure durability in the most challenging environments, maximising uptime and minimising call-outs.

A dream to clean Sumo's overhanging faceplate design is easy to wipe clean and minimises gaps to prevent food and grime getting trapped inside.

Bouncepad Luna Take tablets from a fixed to mobile in an instant with our secure dock 'n' charge system for retail.

All-in-one Luna Empowers staff with assisted selling; engage customers with self-service points, makes visual merchandising more dynamic; and integrate simpler POS.

Never miss a sale with the **Bouncepad Luna** secure dock and charger system for tablets. On the move it's a mobile selling tool, back at base it's a sleek fixed service point, **Luna** lets you keep pace with shoppers, switching between service modes effortlessly

Mobile Assisted Selling Service Point

Tech Specs

Smart Access Luna's smart Fob uses simple RFID authentication to give staff the power to free tablets from fixed locations and turn them into mobile assisted selling tools.

Re-inventing retail for the 21st Century Customer

Powered Up

Luna keeps tablets ready using wireless charging through contact points on the Dock and Case. The Dock is small yet mighty, packed full of useful features that you can use to enhance your in-store experience.

3.5mm headphone port
Anti-slip feet for desk use when undocked
Power-indicating light
Pass-through data and audio for external connectivity

www.pos-security.net

The secure dock and charge system

Simply Secure

Luna's Dock automatically locks whenever a Case is placed inside, which means your staff can securely store tablets without worry. Customers can still find what they need with access to key tablet features.

Precision machined stainless steel
Swivelling cradle for adjustable viewing angle
Electro-actuated automatic lock

www.pos-security.net

Transforming tablets into multitasking service companions

RFID unlocking for quick and controlled access

Visual and audio feedback for locked/unlocked status

Smart Access

Only staff have the power to free Luna. Simply place Luna's smart Fob in front of the Case and let the RFID take care of authentication, automatically unlocking the Dock and freeing the tablet for mobile service.

>>>> INNOVATIVELY DESIGNED IT SECURITY SOLUTIONS THAT WORK <<<<

Apple Mac Pro

Features and Benefits

- ❖ Aesthetic security product offering top of the range security.
- ❖ High security locking mechanism.
- ❖ Key options keyed alike or keyed to differ.
- ❖ Innovative design allowing full ventilation. No overheating.
- ❖ Allows full access to all ports and switches.
- ❖ Physically bolts to the desktop or floor.(desktop recommended).
- ❖ Heavy duty spreader plate for desktop fixing.
- ❖ Quick release & installation in and out stand.
- ❖ Optional fixing point for 9mm security cable.

Because of the Mac Pro air cooling design. We recommend desktop fixing. If floor fixed dust particles intake can increase due to the floor traffic. Desktop fitting also prevents accidental damage (being kicked).

Mac Pro Security Bracket size H 30 CM Widest 24CM Weight 2.8 KG

Apple's new Mac Pro System has been designed with a new fantastic compact design. The product itself is both smaller and lighter than the previous Mac Pro. The New Mac Pro costs between £ 2500 - £10,000 +VAT including software.

The Mac Pro is a high value item that's easy to steal.

Access to all Ports / Excellent ventilation

Offers 24 Hour Protection against theft 365 days a year

Asset Labels. Designed to meet your requirements

They can be a 2 or 3 colour print with or without Sequential numbering and Bar-coding

These are highly flexible security labels produced from self adhesive white ultra destruct vinyl material. Any attempt to remove will result in the material fragmenting **thus asset cannot be substituted and authentication of products is** preserved. These labels are produced using the highest quality materials and print processes with exact matching of corporate colours.

IMPORTANT – our labels satisfy both an **ASSET** and **SECURITY** function. They are made of fine tamper-resistant material with a high-tack adhesive which attaches firmly to the dimpled finish found on office equipment. **They cannot be removed intact** and cannot be moved to other equipment. Once attached, they require a period of 6 hours for the adhesive to fully cure.

The Pennine Acute Hospital Labels.

All styles of asset labels can be designed and supplied. Labels can be produced in any size, shape or colours. Sequential number ranges with prefixes or suffixes, any recognised Barcode Symbology (Type 128 used as standard) Durable varnished finish Type 'C' Ultra-destructible vinyl

Also Available Foil Laminated These Asset Labels employ a permanent acrylic adhesive. The finish is a "metalised" high gloss, very grime resistant and could be considered for applications where appearance is especially important although, by nature of the material, they can be removed intact.

COMISSIONING & TRAINING

Our 90 day commitment to training, ensuring you and your staff are trained - giving you the best from your system.

Click Fire & Security Ltd is committed to a policy of customer satisfaction and Quality Assurance. The Quality Operational and management policy has been designed to ensure that from the initial contact to the provision of the installed system, the design, specification, installation, service and maintenance of our life safety and security systems comply with the highest standards, customer requirements and exceed our clients expectations. To achieve these objectives all employees are continually trained on our products, services and are monitored to ensure for the quality of work they undertake is to the required standards.

Latest technology in CCTV monitoring This system provides trap protection to monitor your external assets and when a person approaches the building. With the iLids analytic system it identifies the intrusion within a highlighted coloured box and then transmits it to a trained operator. The operator will assess the activation and can be instantly connected to the onsite audio system where they can deal with the situation, substantially lowering the risk to site
